When considering software, compare it to what we offer.....Read On

Fifteen years being involved in the shredding and recycling industry has allowed us to develop the unique and robust software solution that we are now offering. Using our software solution you will be able to automate and streamline your company with unbelievable functionality. Our robust enterprise ready solution offers you the following functionality.

- The database platform we use is MySQL. MySQL now owned by Oracle, is able to handle virtually any load. Virtually no limit to the number of transactions is what we offer.
- Multi Company and Multi server ready. **Your head office can generate or view up to date reports from any of their locations, worldwide as well as export to Excel, PDF or DOC.** Give your customers the information they need anytime in the format they require.
- Call center prevents scheduling of service to customers in arrears.
- No more printed route slips. Route assignments can be **automated** by a number of criteria. Vehicle loads and warnings are automated.
- Route scheduling into the future is available. i.e. holidays
- Data from handhelds is **live, no batch processing.**
- One time special notes, alert your driver of **important customer details.**
- As your service people complete their stops; re-routing can be achieved in order to create a team effort and finish the day quicker. Live tracking of completed orders gives your traffic department visibility throughout the day.
- Private messaging to your service personnel.
- Your service personnel can add extra items in the field to existing orders on the fly.
- **On-Site certificates of destruction if required.**
- The choice of displaying charges on printed ticket on a per customer basis.
- **Automated invoicing.** When customer signs; the customer is ready to be invoiced.
- **Automated bin rentals, fuel surcharges or flat rate invoicing.**
- Customer center accommodates collection notes.
- Menu level security. User access only to relevant menu items.
- Digital signature capture.
- **Customer web portal** for review of their records and transactions.
- Inventory control. Know where your bins/assets are at any time.
- The most rugged field device in the industry with built in printer. This means less hardware to fail in the field.
- **Streamline** your office personnel, really...
- Software cost is based on a per user fee. It pays for itself within the first year of use.

We use the most rugged weather proof, handheld industrial terminal in the industry.
